

Wondering what the Harris Sponsored FIRST Robotics Team 1511 is up to?

Come find out at the Seventh Annual Rochester Robotics Rally!

Sunday February 20th 10 am to 4 pm at Penfield High School's East Gym

LOGO MOTION™ is played by two competing alliances consisting of three robots. The teams compete to hang as many inflated plastic shapes (triangles, circles, and squares) on their grids as they can during a 2 minute and 15 second match. The higher the teams hang their game pieces on their scoring grid, the more points their alliance receives.

The match begins with one 15-second Autonomous Period in which robots operate independently of driver inputs, for the rest of the match, drivers control robots. The match ends with robots deploying minibots onto vertical poles, the minibots race to the top of the pole to trigger a sensor and earn additional bonus points.

For the past 5 weeks Team 1511, and the roughly 20 teams from the greater Rochester area, have been working tirelessly designing, testing and redesigning this year's robot(s). Come see the excitement as these teams scrimmage against each other for the first time!
